Montgomery County Issues Emergency Declaration and Update on Two Presumptive Positive Cases

Norristown, PA (March 8, 2020) – Montgomery County officials and the Office of Public Health (OPH) provided an update on the two presumptive positive cases of 2019 Novel Coronavirus (COVID-19) in Montgomery County. The cases were identified at the Emergency Operations Center in Eagleville, Pennsylvania.

The individuals are an adult male Worcester resident and an adult female who lives in Lower Gwynedd. Both have mild symptoms that do not require hospitalization and are currently in isolation at home. Each was exposed to the virus while traveling in an area of the United States where COVID-19 is present. The OPH is continuing to monitor the patients and identifying anyone who may have been in close contact. No other details about the patients will be provided to protect their privacy.

“Spread is expected, but please don’t panic. There has been no evidence of community transmission in Montgomery County,” said Dr. Valerie A. Arkoosh, Chair, Montgomery County Board of Commissioners. “If you have COVID-19 symptoms, please stay home and call your healthcare provider for further instructions.”

“We are asking all employers to consider alternative work models such as working remotely and staggered schedules,” said Kenneth E. Lawrence Jr., Vice Chair, Montgomery County Board of Commissioners. “Employers should also consider offering or adding paid sick time.”

The Commissioners also signed a Declaration of Disaster Emergency, which will enable the County to mobilize resources with less red tape.

This is an evolving situation. To get the latest information and updates regarding COVID-19, please visit the Montgomery County COVID-19 Data Hub at www.montcopa.org and click on "Corona Virus Update."
