Dear Glenside Resident:

As the Developer for the Wawa project located at the corner of W. Waverly and Easton Road, we would like to provide an update you on the progress of the development. As you know, over the past several weeks we have encountered a couple of events, including power interruptions and noise disturbances, which have negatively impacted the local community. We apologize for these events and assure you that we are working with all of our partners to avoid similar issues as this project continues. If you have concerns about the manner in which the site is maintained or the work that is being performed, please feel free to contact us.

We are also writing to advise you of a development that will impact the W. Waverly Road closure. During the most recent phase of the project, we discovered a PECO duct bank (concrete encased conduit) in the road that must be relocated. We proposed to move PECO's duct bank, but PECO declined - advising that PECO itself will perform the work. As such, it is anticipated that the W. Waverly Road closure will be extended beyond the originally planned forty-five (45) day time period, for four to six additional weeks. We apologize for this delay, and assure you that we will work safely and diligently to complete the road realignment portion of this project as quickly as possible. If you have questions or concerns about the extended road closure, please contact us.

Thank you for your patience and understanding during this process.

Very truly yours,
Provco Pinegood Glenside, LLC

Bruce A. Goodman
