Dear Valued Customer:

At PECO, we are committed to providing safe and reliable energy for our customers and the communities we serve. As part of our work, we will be upgrading and installing new equipment to enhance the local electric distribution system in your area.

About the Project:

- ~ More than \$3 million will be invested to enhance the local electric distribution system for you and your neighbors.
- ~ Tree work is scheduled to begin in Summer, and construction will begin soon after tree trimming is completed.
- ~ Work will include pole and cable replacements.
- ~ The majority of this work will occur along Montgomery, Harrison, Union, Cadwalader, and Park Avenues, High School, Ashbourne, Mill, Gerard, Church, Waring, Cedar, Fairview, Westview, Upland, Stahr and Shoemaker Roads.
- ~ To help prevent power outages caused by vegetation, crews will also be installing reinforced tree-resistant aerial electric lines. These lines are stronger than traditional lines and can better withstand falling trees and tree limbs.
- ~ Work will typically occur from 7:30 a.m. to 5 p.m., Monday through Friday.
- ~ The project is expected to be completed by the middle of 2020 and work will be performed by a qualified PECO contractor.

Crews may need to temporarily interrupt service to safely complete some of this work. We will work with local residents to ensure they are informed in advance of our activities and any planned interruptions. We will work closely with local officials to minimize the impact on traffic and pedestrians whenever possible. Access for services such as trash removal, student transportation and emergency vehicles will be maintained during construction.

0542-01-2000751-0001-0001503

We are dedicated to keeping you informed about our work, listening to your input and modifying plans based on your feedback when possible. If you have any questions about work during construction, please contact Michael Herman at 484-685-7603 or michael.herman@exeloncorp.com.

Sincerely,

William Patterer
Director, Regional Electric Operations, PECO
